SMARTHEP

10th January 2018

### **Letter of commitment**

To whom it may concern,

I hereby certify that Wild Tree Tech intends to participate in the SMARTHEP network should the network be selected for funding by the European Commission. In this commitment letter, on behalf of Wild Tree Tech I specifically indicate the level of involvement of our company to your programme.

Wild Tree Tech recognises the importance of fostering fruitful exchanges between academic research and industrial applications, in the strongly rising field of Data Science. Wild Tree Tech also acknowledges the importance of offering to early-stage researches a programme in which they can learn the skills needed for our sector, from a rigorous academic perspective as well as for connecting fundamental research with industrial applications. Wild Tree Tech will participate in the SMARTHEP network as associated non-beneficiary partner in the following ways:

- Wild Tree Tech will provide training in form of lectures and talks to workshops organised by the SMARTHEP network on commercial applications of real-time analysis
- Wild Tree Tech personnel will host two secondments for ESRs in the network

The participation of Wild Tree Tech in the research and training programme of SMARTHEP is in line with the research work described in the proposal ("part B"). Wild Tree Tech looks forward to participating to SMARTHEP, and wishes to express a strong interest in furthering the collaboration between academic research by the network participants with industrial applications. In particular Wild Tree Tech recognises that its participation

in SMARTHEP will establish connections with high-energy physics researchers, which are of interest for the possible future career development of the latter in the industrial market after completion of their studies within the academic institutions.

It is understood that all costs incurred by Wild Tree Tech related to the implementation of the practical research and/or complementary training will be reimbursed by the relevant beneficiary of the Grant Agreement. Wild Tree Tech shall invoice these research training costs to the appropriate full network partner(s).

To fruitful collaboration,

  
Tim Head, CEO
