Le Recteur

Letter of commitment for the H2020 MSCA-ITN-ETN 2019 SMARTHEP proposal.

To whom it may concern,

As a Partner Organisation, the University of Liège is pleased to confirm its full support to the SMARTHEP project proposal, which will provide an outstanding opportunity to train a new generation of early-stage researchers with key interdisciplinary skills in the fields of high-energy physics and machine learning.

We trust that SMARTHEP will lead to ground-breaking scientific results at the interface between particle physics and machine learning.

In particular, the University of Liège confirms that it will be pleased to welcome ESRs for secondments, to work under the supervision of Prof. Gilles Louppe.

Yours sincerely,

On behalf of the participating organisation,

Signature of Representative of the partner organisation

Name of the Legal Representative: **Prof. Pierre WOLPER**
Position: **Rector**
Date: 19/12/18
